Handycup® and Handycup® Institution

Ergonomic cup for handicapped children and adults

Handycup® is an ergonomic cup developed for handicapped or bedridden adults and children with difficulties handling an ordinary cup. Handycup® has an oblique form that enables drinking without bending the neck, which means that if you are bedridden or suffering from cerebral paralysis you can still use this cup. Handycup® has two large handles that makes it easy to get at good grip on the cup. The cup also has a broad base that gives it a firm standing on the table which prevents spilling accidents. Handycup® is transparent so that liquid contents are visible. Handycup® is produced in clear polycarbonate and CE-marked. Handycup® is household dishwasher- and microwave safe.

HANDYCUP® Institution

Handycup® Institution is especially developed for institutions that use industrial dishwashers washing by 80°C for 3 minutes. Handycup® Institution is made in Copolyester with ml print making it easy for nursing personnel to check how much liquid the user has drunk.

ASSORTMENT

- Clear with lid and with or without ml print
- Blue, green or red with lid
- Handycup® Institution clear with ml print and lid

Henro-Grip®

A cutlery for handicapped children and adults

Henro-Grip® is developed in cooperation with ergonomists and designed to facilitate the eating situation for those who find it difficult to handle ordinary cutlery. The cutlery has a curved design that enables eating without bending the arm. Henro-Grip® has safe grip handle for both right and left handed. Henro-Grip® is household dishwasher safe and thereby easier to clean. Henro-Grip® is produced in PP and TPE. Henro-Grip® in red is specially developed for people suffering from autism or dementia/Alzheimer.

ASSORTMENT

- Henro-Grip® **Blue** spoon or fork for right handed - for kids up to 8 years
- Henro-Grip® **Green** spoon or fork for left handed - for kids up to 8 years
- Henro-Grip® **Grey** knife, spoon or fork for right or left handed - for adults
- Henro-Grip® **Red** knife, spoon or fork for right or left handed - for adults

Henro-Strap

Strap for cutlery, Henro-Strap

The elastic keeps has been shaped to hold the cutlery in the hand, ensuring that the item is not lost.

It's easy to adjust and fits the entire cutlery range as well as other hand tools.

Because the strap is adjustable, it can be used by both children and adults.

The strap comes in black and it can withstand ordinary dishwasher

Henro-Plate

A plate for disabled children and adults

Henro-Plate is a plate where one edge is higher than the other. This sloped design makes the food slide to one side, thus enabling eating with one hand. The plate is delivered with small rubber feet to be attached at the bottom. The rubber feet have anti-slip function that makes the plate stand firmly on the table.

Henro-Plate is made in PP with 30% minerals, and the plate has a utility temperature from 0-100°C. Henro-Plate is dishwasher safe and thus easy to keep clean. It is recommended that the small rubber feet are removed before wash, since they might fall off in the machine. Henro-Plate is also microwave safe, so you can heat food directly on the plate.

Henro-Plate is available in white with black small rubber feet.

Henro-Card

A cardholder for people with diminished finger control

Henro-Card is a cardholder for people with limited use of their hands

Henro-Card enables people with diminished strength in or control of their hands to enjoy playing cards

Henro-Card is produced in a lightweight material

Henro-Card has a curved form that provides a clear overview of the cards

UNI-DOS

Medicine dosage system

UNI-DOS secures a safe and easy dosage of medicine for users who need to take more kinds of pills daily.

UNI-DOS is produced in ABS (bottom) and SAN (lid). The lid has extension stop at each compartment, there is a writing field for the user name, writing in Braille on the bottom and the UNI-DOS is dishwasher safe.

UNI-DOS is available with a selection of texts.

(Please check www.henro-tek.dk for further details.)

Drainbagholders

Drainbagholders for hospitals and institutions

The drainbagholders are made in Polyamide 6, a strong, durable material. They do not crack, and they have high tensile strength. The drainbagholders can be autoclaved up to 127°, and they are CE-marked.

The drainbagholders are available in **blue** for round bedposts and **green** for square bedposts.

This is just a short presentation with photos of our products. Price list and more specific details can be obtained by contacting us either by mail or phone.

Henro-Tek is a small Danish manufacturer of small aids for daily living in plastic. All products are own design, the majority made on our factory, free of phthalate and CE marked.

We look forward to hearing from you.
